

One team, one bigger picture!

Ready to turn teamwork into art?

Bring your people together through a large scale collaborative painting experience, designed to strengthen teamwork, spark creativity, and bring your company values to life.

Using individual canvases, your teams will work together to create one striking, unified artwork — a powerful visual representation of who you are as a business and what your people stand for.

How it works

Participants are divided into teams, each responsible for painting at least one canvas. While each canvas is worked on individually, all of the canvases must connect seamlessly to form one complete picture when revealed.

This challenge encourages

- Collaboration across teams
- Strategic planning and communication
- Creative problem solving
- Shared ownership of a collective outcome

The experience culminates in a final reveal, where all the canvases are assembled to unveil the complete artwork. The final result is a large, impactful artwork that symbolises connection, alignment and purpose.

This is more than a painting session - it's a shared experience that builds alignment, trust and engagement. The event is Inclusive — and no artistic experience is required.

Included:

- All equipment required
- Professional, lively host
- Experienced event team
- Public liability insurance and full risk assessments
